Results of Visit [redacted]

STATINTL

In Attendance: [redacted]

STATINTL

1. Spare parts list has been made up [redacted] surprised that it was not here yet. Will consist of approximately 1 year supply under normal use. Printed circuit cards may be returned [redacted] for repair on time and material cost basis. Asked [redacted] to put highest priority on getting the parts list here [redacted] One question to be resolved: Should we purchase parts [redacted] at a [redacted] mark-up or deal directly [redacted]

2. Maintenance proposal will be made up [redacted] would handle the optical mechanical portion, and sub-contract the electronic portion [redacted] Would consist of a preventive maintenance check every 60 days with emergency maintenance visits as required as long as they don't exceed an average of one a week. Warranty on [redacted] parts is for a period of one year. However, they were a little vague on how we would work out labor and travel costs for warranty items. This cost would usually, but not always, be on us, depending on the situation.

3. Training will be provided free of charge [redacted] for a limited number of electronic technicians if we so desire to send any. It would require two to four weeks to train a man to completely take over maintenance of the instruments.

4. Plotter proposal on way. However, I indicated that we would need it within the next month or would have to proceed without it. It would require about twelve months for delivery from the time the order is received. This would include [redacted] time also.
